

What Kid Magic Offers

- * **A central location** conveniently located in Bellevue Wa.
- * **Low Teacher/Student ratio** of 1/10 for our Preschool/Pre-K age students. (ages 3 to 4 and 4 to 5)
- * **Lower Teacher/Student ratio** of 1/6 for our Early Learners. (ages 2.5 to 3)
- * **Close communication** via phone, email, newsletters, teacher contact, web site, and parent conferences.
- * **Choice of parent involvement** in the classroom.
- * **Active Learning** activities for all age groups.
- * **Academically Enriched Curriculum** geared to children's interests and abilities.
- * **An Early Start Reading program and a Learn To Print program** that are both unique to Kid Magic.

The process of children learning is a rare kind of magic, it is Kid Magic.

Location

Kid Magic Center is conveniently located in Bellevue Washington; we are tucked away just off Bel-Red Rd in back of the Continental Business Park. Look for the picket fence and the garden space we share with the local bunny!

We offer enrichment activities (art, music, drama, & science) that serve ages 2.5 to 5 with an active hands on program in both our indoor and outdoor spaces.

In addition to enrichment activities, our unique Early Literacy program includes our Early Start Reading & our Learn To Print programs, both exclusive to Kid Magic Center. Children are involved in one to one tutoring, as well as small and large group participation. We also offer Early Literacy tutoring opportunities for kindergarten & first grade children after school.

About Our Programs

Kid Magic offers young learners an active hands on approach that supports an enriched curriculum.

Our curriculum is planned and guided to provide young learners experiences that will offer opportunities to maximize growth in all areas of the schooling process.

Because children learn different things in different ways at different times for different reasons, we support a curriculum that recognizes the uniqueness of children.

It is the philosophy at Kid Magic that all children are unique and that parents and teachers who support that uniqueness provide a positive influence in the growth of children.

Our programs promote a social environment where children flourish and skill grouping provides a supportive configuration for learners of varying ages. Art, Music, Drama, Science, and Math, as well as our exclusive Early Literacy Program activities, all offer an academically enriching curriculum that is geared to children's interests and abilities.
